EMA Technology is a local and proud Australian IT Services company. Staffed by technology experts, we aim to deliver professional IT services to your organization. We have a vast and wide range of competencies and a demonstrated delivery of IT projects across a wide range of clients. A small niche team that aims to fill the void created in the market by the major players, we strive for and deliver timely and professional services to our clients.

***ABOUT US** The team have combined over 30 years' experience in IT infrastructure services across Government and Non-Government business. We are a fast-growing team based in Sydney and look to expand further and diversify on our current service offerings. With minimal overhead we can provide fast effective services quickly and reliably. Our positive client outcomes and value that we add reinforces our abilities and our strategic goals to really be a disrupter in the tightly contested professional services market.*

"Thanks for your great work on this"

– Vanessa Stokes, CIO WSLHD

Our Azure Cloud migration was a complete success with no downtime to critical gaming applications"

– Clinton Sharp, IT Manager 7Hills
RSL Group

SCCM- SCOM- MDT: We have completed large scale enterprise deployment and configuration of SCCM infrastructure across multi-site tenancy's within AD for NSWHealth, Veolia and UTS. We have created zero touch network bootable images, complex deployment task sequences, and redundant Infrastructure that fully incorporated Citrix application virtualization.

AD, DNS, DHCP We have undertaken projects to upgrade Domain Controller services withing 12000 seat organizations across multiple sites, including DNS and DHCP redundancy installations. We have deployed a scalable GPO structure and adhere to Microsoft certified best practices, when applying policy configurations

CLOUD ARCHITECTURE We have deployed VMs and scripted containers in Azure, Google Cloud and AWS. We have designed complete off premise cloud infrastructure and hybrid cloud deployments for industries such as RSL clubs and Clubs NSW and NSWHealth. EMA Technology uses best practice guidelines to achieve the best RTI for cloud hosted infrastructure.

PACKAGING AAS: We have highly skilled team of Application packagers that can package and deploy your MSI and exe-based applications for enterprise deployment with SCCM. Our FTP Portal allows for a seamless and timely service.

PEN TESTING SECURITY: Our certified Penetration testers are able to test for vulnerabilities in your network and recommend ways to move forward in an ever-changing IT security landscape.
